CHLD 102: Child Growth and Development

Portfolio Assignment #2: Developmental Case Study

| Learning Objectives | 1. Articulate theories of growth, development and learning in all children ages 0-8 years, and demonstrate awareness of these theories as they impact children through adolescence.  
7. Identify strategies supportive of the typical and atypical development and the learning patterns of each child and their family within the early childhood years.  
8. Explain the connection between family culture, language, and environment in the understanding of growth and development and the implications of these connections for effective practices within the early childhood environment |
| DEC Recommended Practices | A16 Professionals seek information directly from families…  
A17 Professionals assess children in contexts that are familiar to the child.  
A20 Professionals assess the child’s strengths and needs across all developmental and behavioral dimensions.  
A31 Professionals report strengths as well as priorities for promoting optimal development. |
| NAEYC Standards | 1a: Knowing and understanding young children’s characteristics and needs. |

The field of early childhood education is shaped by varied theories of how children grow and develop, as well as research demonstrating the impact and effectiveness of various learning strategies, environmental design, and curriculum. Becoming a professional within the field requires familiarity with this broad base of knowledge, as well as the ability to successfully apply this information.

Your Developmental Case Study is divided into two parts.

Part One: Data Collection
Part One of this portfolio assignment requires that you conduct two observations and an interview of a family member or the child’s primary caregiver. You will be addressing several questions based on this observation and interview data. Part One is divided into the following steps:

- Select a child between the ages of birth and eight. This child should not be a relative, but be a child that you have ongoing access to.
- Review relevant course materials to develop a profile of where you would expect this child to be developmentally based on developmental norms. You can also refer to the document Red flags: A quick reference guide for early years professionals in York region, early identification of red flags in child development prenatally to age six. [http://www.york.ca/NR/rdonlyres/xbyvzu2yzocuced3xlaizvqcnrq4ah554cuf5tlyg6pzebfgqets4sbk4w3prg2ftlpo5dty2tprok3r4g5rqucomf/Red+Flags+Guide_WEB.pdf]
- Include in your profile the following areas of development:
  - Physical
  - Social
  - Emotional
  - Cognitive
  - Language
• **Observe the child.** Select a method of observation from those presented in the handout assessment strategies. Be sure to observe the child on two separate occasions for at least an hour. *Please note: Although information gathered during a two hour period of time can be informative, observation and assessment data needs to be collected over an extended period of time in order to be valid.* Based on your observations:
  o Write a paragraph summarizing what you felt were the strengths and/or challenges of the observation strategy you selected.
  o Identify five strengths of the child you observed. Include your identification of strengths:
    ▪ Why you identified the strengths you did
    ▪ Examples of how these strengths were demonstrated during your observation
  o Identify one area of challenge for the child you observed. Include in your discussion of this area of challenge:
    ▪ Why you identified this area of challenge
    ▪ Examples of how this challenge was demonstrated during your observation

• **Interview the child’s primary caregiver or a family member** using your observational data as a tool for discussion. Include in your interview:
  o What you saw as the child’s strengths
  o What you perceived was an area of challenge
Ask the caregiver/family member:
  o What factors they feel contribute to the child’s overall strengths
  o How the child’s strengths and/or factors within his/her environment can contribute to addressing identified challenge

**Part Two: Developmental Learning Profile**
For Part Two of your assignment, you are required to complete a [Developmental Learning Profile](http://www.heartland.edu/documents/heip/faculty/HandoutDevelopmentalLearningProfile.pdf). Based on the information presented in Part One of your assignment, fill in the following information on the Developmental Learning Profile handout. Following your transcription of the data collected in Part One to the Developmental Learning Profile, summarize your recommendations for the child in terms of supporting their overall development within the early childhood environment.

For this assignment, you will turn in to your course instructor:
• Your responses to Part One, including rough notes from your observation and interview
• The completed Developmental Learning Profile
